PROFESSIONAL SUMMARY

Full Stack Laravel Developer with over one year of hands-on professional experience in designing and delivering scalable web applications and backend services using PHP, Laravel, and MySQL. Proven expertise in developing secure RESTful APIs for web and mobile platforms, implementing robust authentication mechanisms, and managing Role-Based Access Control (RBAC). Strong foundation in MVC architecture, database design, API optimization, and backend performance tuning. Dedicated to writing clean, maintainable, and production-ready code aligned with industry best practices.

TECHNICAL SKILLS

- Backend: PHP, Laravel (v12), RESTful APIs, OpenAPI (Swagger), API Versioning
- Frontend: HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), Alpine.js, React.js, Inertia.js
- Database: MySQL, Eloquent ORM, Schema Design, Query Optimization, Indexing
- Authentication & Security: Laravel Sanctum, JWT, Laravel Passport, RBAC, Middleware
- Tools: Git, GitHub, Postman, Swagger UI, VS Code, PhpStorm
- Concepts: MVC Architecture, OOP, SOLID Principles, CRUD Operations, Exception Handling, Performance Optimization

WORK EXPERIENCE

Full Stack Developer – Appstronaut IT Solution, Bangalore (Feb-2025 - Present)

- Architect and develop scalable web applications using Laravel, PHP, and MySQL, ensuring high performance and maintainability.
- Design and implement secure RESTful APIs to support web and mobile application integrations.
- Establish authentication and authorization frameworks using Laravel Sanctum, JWT, and Role-Based Access Control (RBAC).
- Build responsive and dynamic administrative dashboards utilizing React.js, Inertia.js, and Tailwind CSS.
- Design efficient relational database schemas and optimize complex queries to enhance system performance.
- Integrate third-party APIs and external services to streamline business workflows.
- Maintain comprehensive API documentation using OpenAPI (Swagger).
- Collaborate closely with frontend and mobile development teams to ensure seamless system integration.

Laravel Developer – Aaran Infotech, Tiruppur (Dec - 2024 to Feb- 2025)

- Developed backend modules and CRUD-based systems using Laravel and PHP.
- Designed and structured MySQL database schemas while managing ORM relationships.
- Built RESTful API endpoints incorporating validation, middleware, and secure authentication practices.
- Strengthened backend development fundamentals through real-time project implementation and version control collaboration using Git.

KEY PROJECTS

Accounting Software for Garments Manufacturing Units

- Developed a comprehensive accounting system including journal entries, ledgers, invoices, sales, purchases, expenses, and financial reporting.
- Designed optimized transaction handling and relational database schema.
- Built dynamic UI components and integrated REST APIs.
- Worked in a collaborative Git-based team workflow.

Healthcare Management System (User App + Admin Panel)

- Built a healthcare platform with appointment scheduling and service management modules.
- Implemented Role-Based Access Control (RBAC) for doctors, staff, and patients.
- Developed secure APIs for mobile and frontend integration.
- Optimized backend workflows and database performance.

Waqin Multi-Tenant Admin Panel

- Developed a multi-tenant architecture supporting gyms, boutiques, optical stores, and retail businesses.
- Implemented tenant-level data isolation and service management modules.
- Built backend APIs for mobile application integration.

Smart Local Mart (S-Mart) – Q-Commerce Platform

- Developed user application and admin panel for grocery and essentials ordering.
- Implemented inventory management, cart, and order tracking modules.
- Designed optimized database relationships for scalable performance.

Mindhive – E-Learning Platform

- Developed course management, user enrollment, and administrative dashboard modules.

ACHIEVEMENTS

- Successfully delivered multiple production-ready backend systems across Accounting, Healthcare, E-commerce, and Multi-Tenant platforms.
- Designed scalable RESTful API architectures supporting web and mobile ecosystems.
- Implemented secure authentication and authorization frameworks across diverse applications.
- Developed and deployed a multi-tenant administrative platform supporting various business verticals.
- Enhanced application performance through database optimization and structured backend logic improvements.

EDUCATION

M.Sc. Computer Science | September 2021 – April 2023

Chikkanna Government Arts College | Bharathiar University, Tirupur, Tamil Nadu

B.Sc. Information Technology | July 2018 – April 2021

AVP College of Arts and Science | Bharathiar University, Tirupur, Tamil Nadu
